STORY

ИСТОРИЯ

Всё началось в крошечной деревне.

Однажды пол катакомб обрушился с лёгким гулом, и из глубин вышел человек. Он сказал, что был королём золотой страны, павшей тысячу лет назад.

Некогда великолепная страна была запечатана глубоко под землёй безумным магом и так и осталась там.

«Я отдаю всё своё королевство тому, кто победит мага», — произнёс он последние слова, обратился в прах и исчез.

Слухи о золотом королевстве разнеслись повсюду, и остров с деревней Мерини стал притягивать искателей приключений и торговцев. Кто-то жаждет сокровищ, кто-то хочет спасти близких, кто-то — разгадать магию подземелья. А кто-то бросает вызов самому «Безумному магу».

СОСТАВ

- Карты подземелья: 125
 - исследование: 75
 - встреча с монстром: 30
 - события: 15
 - побег: 5
- Карты персонажей: 28
- Карты монстров: 30

ПОДГОТОВКА (1/2)

- ① Разделите персонажей на 5 партий (см. схему ниже).
- ② Каждый выбирает партию и выкладывает карты перед собой. Остальные — в коробку.
- ③ Сложите в запас жетоны еды/денег, маны, меч и кубики.
- ④ Возьмите стартовые жетоны по картам партии (еда/деньги общие, мана личная).
- ⑤ Жетон уровня — верхней стороной вверх.
- ⑥ Колода подземелья + сброс. Рука по 5 карт. События из стартовой руки отложите, доберите до 5, верните события в колоду и перемешайте.

② Each player chooses one party they will be in charge of and receives all the character cards for that party and places them side by side on their play area. The character cards that no one chooses are not used in this game and are put away in the box.

③ Place food/money tokens, magic tokens, the sword token, and dice all together. This is called "the stock".

④ **Each player receives the various tokens according to the "Initial Possession Token" instructions on the character cards in their party.**

Food/currency tokens are managed by the entire party, while magic tokens are managed by each character individually.

⑤ Each player receive one Dungeon Upper/Lower level tile and places it, **with the Upper Level side facing up.**

⑥ All the Dungeon cards are turned face down and shuffled to make one deck. This is called the "Dungeon deck". A space for a "discard pile" is reserved next to the deck. **Each player draws five cards from the labyrinth deck to make a "hand".**

Only you can see the cards in your hand, be careful not to let other players see them. Each player checks their hand, and if there are any "Event Cards" in their hand, they put them aside and draw cards from the labyrinth deck so that they have five cards in their hand.

Then, all the Event cards are put back into the Dungeon deck which is shuffled again to make a new deck.

⑦ All the item cards are placed face down and shuffled to make a single deck.

ПОДГОТОВКА (2/2)

⑦ Колода предметов рубашкой вверх.

⑧ Двух боссов лицом вверх. Остальных монстров: 15 верх + 15 низ, колоды лицом вверх (стороной с монстром).

⑨ Стартовый игрок — по жребию.

Схема расстановки — справа и внизу.

GAME FLOW

ХОД ИГРЫ

Игра идёт по ходам по часовой стрелке от стартового игрока до конца (стр. 26).

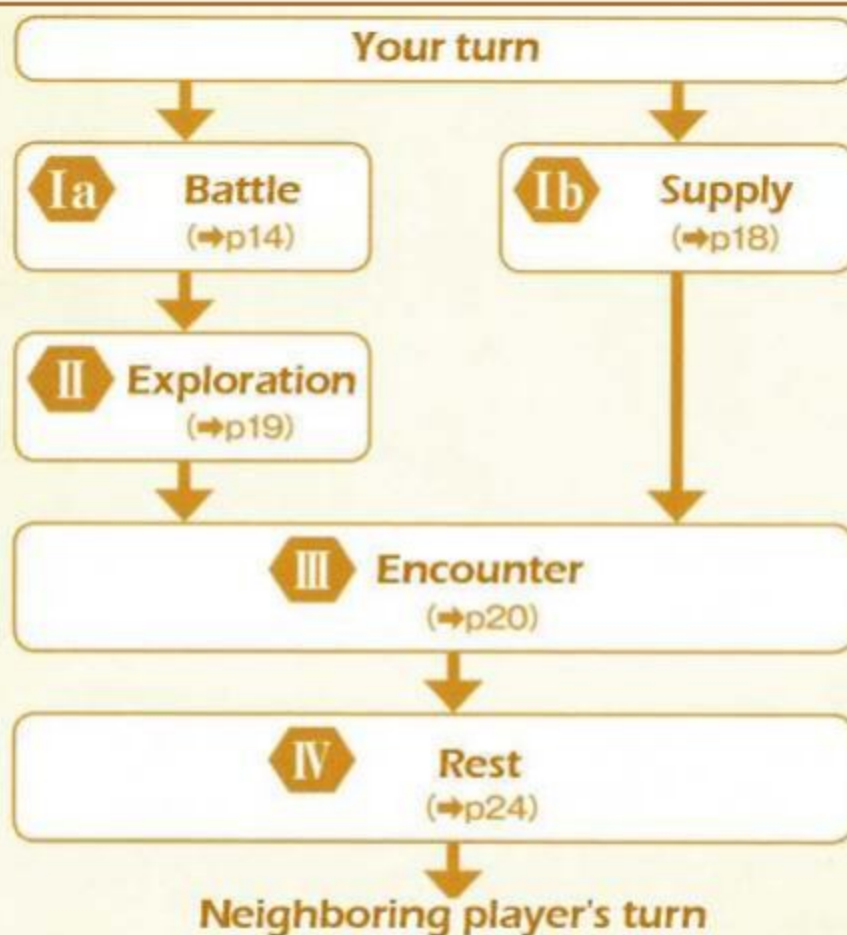

Сначала выберите Ia Бой или Ib Снабжение. После боя можно II Исследование; после снабжения — нельзя. Затем всегда III Встреча и IV Отдых.

Схема фаз сохранена ниже:

Ваш ход → Ia Бой (стр. 14) или Ib Снабжение (стр. 18) → II Исследование (стр. 19, только после боя) → III Встреча (стр. 20) → IV Отдых (стр. 24) → ход соседа.

FLOW OF A TURN

The player whose turn it is to play performs actions in the following order. First, the player decides whether to perform Ia Battle or Ib Supply. If the player performs Ia Battle, they may then perform II Exploration, but if they perform Ib Supply, they may not perform II Exploration. In either case, the player then performs III Encounter and IV Rest, after which it is then the turn of the player to the left.

Game Structure

ОБЗОР СТРУКТУРЫ

Ведёте партию и соревнуетесь в продвижении вглубь.

II Исследование: выкладываете карты «Пройдено X%». Два уровня — верхний и нижний. При сумме $\geq 100\%$ на уровне появляется босс.

$\geq 100\%$ наверху → Химера Фалин; после победы — переход вниз.

$\geq 100\%$ внизу → Сисель; после победы — конец и подсчёт очков.

Побеждает набравший больше всех победных очков.

Game Overview

Players control a party of adventurers with different character talents competing to reach the treasure at the end of the Dungeon.

The basic action to head deeper into the Dungeon is the II Exploration phase (p19). The exploration proceeds by placing an exploration card marked Travel X% on your play area. There are two levels in the labyrinth, the Upper Level and the Lower Level, and a boss monster will appear when you have explored 100% or more of each level (when the total X% you have explored equal or exceeds 100%).

When you have broken through 100% of the Upper Level, the Chimera Falin Boss monster will appear, and after defeating her, you will be taken on to the Lower level.

When the player has reached 100% of the Lower Level, Sissel the Lunatic Boss monster will appear, and after defeating her, the game will end and the

players move on to score calculation. Rank is determined by the number of points won, with the first place being the winner.

Combat system structure

БОИ, ИСТОЩЕНИЕ, ЕДА

Картой встречи (III) кладёте верхнюю карту колоды монстров (верх/низ — по уровню цели) на подземелье без монстра.

Пока на вашем подземелье есть монстр — исследование нельзя, пока не победите (Ia).

Участники боя истощаются (карта боком). Восстановление — едой (или магией). Еда в основном от готовки сразу после победы; снабжение даёт 2 еды, но без исследования.

Восстановление и добор руки — в IV Отдых.

In a Dungeon where a monster is placed (encountered), you cannot do II Exploration until the monster is defeated.

To get rid of a monster, you must do the Ia Battle (p14) action and defeat it. Therefore, the game procedure is to combat and then explore. Of course, if there are no monsters in your labyrinth you do not have to fight.

Exhaustion and party status mana-tokens

Adventurers who participated in battle will be in a state of exhaustion. Adventurers in a depleted state can't do anything to win or to carry out the subsequent adventure smoothly. It is necessary to eliminate the exhaustion state of adventurers.

In order to restore your adventurers' Food tokens are used (there is also the option to restore them with magic).

Food tokens are very valuable. It is dangerous that isn't easy to gather the only way to gather it is to cook the monsters' & adventurers' have defeated!

You can only cook a monster immediately after defeating it in battle.

Food tokens

You can also obtain Food tokens by performing the action II Supply (p16), but note that you cannot do any exploration if you decide to perform this action. However, supply allows you to discard unwanted cards in your hand, so it will be important to know when to use it.

Recovery from exhaustion is done with the action IV Rest (p24) to a exhausted player's hand.

Review of the game structure

КРАТКИЙ ПОВТОР

Цель: 100% верх → победить Фалин → 100% низ → победить Сиселя.

Соперникам — слать встречи; выгодных для готовки монстров можно класть себе.

Истощение лечится едой (готовка или снабжение). С монстром на клетке сначала бой, потом исследование.

Наслаждайтесь миром «Подземелья вкусностей»!

Ia BATTLE

Ia. БОЙ

Если на подземелье есть монстр — можно выбрать бой. Иначе бой пропускается → II. С монстром нельзя исследовать, не победив. Не хотите драться — Ib Снабжение.

Выберите ≥ 1 неистёкших персонажей и поверните боком. Если сумма физ. силы (и маг. при трате маны) $\geq$ силы монстра — победа. Иначе монстр остаётся, II недоступно. Бой — 1 раз за ход.

«xD (+y)»: бросьте x кубиков и прибавьте y.

Battle system

The active player in Ia Battle chooses any number of character cards from their adventuring party to participate in the battle, and turn(s) of them to their exhausted state (sideways). The player then rolls the dice to determine the result of the battle.

If the sum of the "Physical Combat Power" of those character cards (including "Magic Combat Power" if magic items are used) is greater than or equal to the Combat Power of the monster card placed in the labyrinth, the adventurer wins and the monster card is removed from the dungeon.

If the Combat value is less than the Combat value of the monster card, the monster wins and the monster card remains on the player's dungeon in that case, the Explore action cannot be performed. Only one Ia Battle can be performed per turn.

Physical Combat Power

For the character card: $\text{Physical Combat Power} = \text{Monster's Strength} + \text{Character's Strength} + \text{Magic Combat Value}$ (if magic items are used).

Combat value of a D20 roll

Each character card has two D20 rolls: its own Physical Combat Value for Magic Combat Value each time when a character card is used in combat. The player can choose to use the character's own Physical Combat Value or the Magic Combat Value for that combat.

obtain the Combat Value for that combat.

Магическая сила

Маг тратит 1 ману → вместо физ. силы использует магическую. Не более 1 маны на персонажа за бой.

A mage can spend mana to study one of his magic tokens to use his powerful magic combat power in place of his physical combat power.

A character card may use no more than one magic token in a single combat.

Battle example

Пример боя

Красный (партия Лайоса) против василиска (сила 10). Без победы исследование невозможно.

There is a Basilisk Combat Value 10 monster card. Unless Red defeat the Basilisk, Red cannot explore the labyrinth any further. Red decides to fight.

There are two different characters cards in the battle as all the party

members "can" participate in the battle.

В бою Лайос и Марсиль → истощены (карты боком).

Red used "Laios" and "Marcille"

For the fight, Red changed her Marcille's changed from her Physical Combat Value of "1" to her

Мана Марсиль: 1 → 3D. Лайос 1D+3. Итого 4D+3. Бросок $1+2+3+6=12 \rightarrow 15 \geq 10$ — победа.

Red rolled four dice and the rolls result in 1, 2, 3 and 6. The total is $1+2+3+6=12$.

Red roll four dice and the rolls result in 1, 2, 3 and 6. The total is $1+2+3+6=12$.

who's fighting strength is 10.

Cooking Process

ГОТОВКА

Если у монстра есть блок готовки — готовьте (боссов нельзя).
Сложите кулинарную силу партии (истощение не важно). $2D + \text{сила} \geq \text{сложности}$ → успех.

Успех: карта оборотом + награда; очки, пока карта у вас.
Провал / несъедобный: вниз своей колоды лицом вверх.

sters) are also automatically

Лимит 5 карт

Приготовленные монстры + боссы + предметы ≤ 5 . Шестую верните в запас, боссов оставляйте. Награду за готовку можно взять даже если карту вернули — очков в конце не будет.

If a sixth card is required, the player will choose which one to discard and the discarded card will be returned to its corresponding stock pile. But you must always keep the Bow Member Cards. If you successfully cook a monster and have 5 or more cards, you can still earn its reward for cooking it even if you return that monster card. However, since it does not remain in your possession it does not give any victory points at the end of the game.

Using the special effects of item cards such as "Gold coins" and "Magic grass" it is possible to return the item card to the stock pile after winning various tokens.

Cooking Example

Red player was able to defeat the "Basilisk"

Пример готовки

Василиск, сложность 8. Сенши +3, Лайос +2. Бросок $4+5=9 \rightarrow 9+5=14 \geq 8$ — «Жареный василиск», 3 еды и 3 ПО, если карта останется до конца.

Laos party has Senshi with a cooking ability of +3 and Laos with a cooking ability of +2, making it one of the best at cooking. If two rolled dice reach 8 or more with those two bonuses of +3 and +2, the cooking will be successful.

Red rolls the two dice and got 4 and 5. The total is $4+5=9$, which is 1.

The Basilisk with a cooking difficulty of 8 was easily defeated. Red player receives 3 food tokens as a reward and the Basilisk's monster card. Red Basilisk. If Red can hold on to this card until the end of the game, they will receive 3 victory points from it.

IIb SUPPLY

IIb. СНАБЖЕНИЕ • СПОСОБНОСТИ

Получите 2 еды. Можно сбросить любые карты из руки. Далее III без II. Полезно при истощении, сильном монстре или плохой руке.

Способности можно использовать в середине действия:

- Магия восстановления — маг тратит 1 ману, восстанавливает одного; сам не истощается.
- Магия слесаря — неистёкший маг тратит 1 ману и истощает себя (= требование «истощить слесаря/ниндзю»).
- Переброс x — неистёкший слесарь/ниндзя истощается и перебрасывает до x кубиков боя.

After the supply phase is complete, the player moves on to III Encounter without doing II Explore first.

Although not being able to explore now, you don't if many character cards exhausted, there are enough abilities to strengthen your deck and cards in hand suitable for exploration, you should choose the supply action to help you build explore in your next turn.

Character Special Abilities

There are three types of character card special abilities: Recovery Magic, Locksmith Magic, and Seal.

A character's special ability can be interrupted and resolved while in the middle of an action.

Recovery Magic The magician can heal (turn vertically) a character in a drained state by spending 1 mana to stack one of his magic items. The wizard does not need to be exhausted afterward.

Locksmith Magic A non-depleted wizard can spend (return to stack) one of his own magic items when exhausted to improve his condition and activate his special ability. Must deplete one Locksmith Magic.

Seal A locksmith or ninja who is not in the exhausted state may pull up to x dice rolled in 1a Battle by becoming exhausted.

II

EXPLORATION

II. ИССЛЕДОВАНИЕ

Не более 1 карты исследования за ход. Можно пропустить → III. После проигранного боя II нельзя, III — можно.

Выложите карту в зону подземелья (проценты видны). Цель: $\geq 100\%$ верх и $\geq 100\%$ низ. При 100% — босс (стр. 22).

Следуйте тексту карты (деньги, эффекты).

Предмет: верх колоды; «reveal» — лицом вверх, иначе можно рубашкой.

Using the Exploration cards

Select any location and you wish to go from your hand and place it on your play area (the board above your party of adventurers in a grid panel that is your dungeon. The cards are placed in your dungeon area in a grid up in such a way that they do not hide the numbers.

As mentioned in the "Overview of the Game" (p. 1), the objective of the game is to explore the dungeon and to reach 100% of the Upper level and 100% of the Lower level areas.

If you want to know if a location is explored or not, you can look at the card that is placed on the location. If the card is face up, it means that the location is explored. If the card is face down, it means that the location is not explored.

Some exploration cards cost money to use or have some effect such as drawing an item card. Follow the instruction on the card.

Exploring a card

When exploring a card, check the card with the top of the item deck. Check its contents and place it face down in your play area.

However, if the card is "reveal" the card is face up so other players can see it.

III. ВСТРЕЧА

Сбросьте 1 карту встречи → положите монстра на любое подземелье без монстра (свое / чужое / ещё пустое). Колода — по уровню цели, не по вашему.

Не более 1 карты за ход; можно пропустить → IV.

Класть себе выгодно: перехватить слабого/вкусного и не получить сильного несъедобного от соперника.

Examples of encounters

Пример встречи

Красный тянет Призрака (сила 6): в бою только магия — неудобно для партии Лайоса; готовка 12, награда 1 еда. Кладёт на синего.

Серебряный ранее положил себе слизня (сила 7, готовка 10, 2 еды, 2 ПО) — выдохнул с облегчением.

exploring the upper level so Red drew a card from the Upper Level monster deck called the Ghost. Its combat power is only 6, but it has a special ability. In combat with this monster, you can only use your magic combat power, which is very troublesome.

The only magic user in Red's team is only a Mage, and Mages' magic tokens are extremely valuable. The difficulty level for cooking this monster is 12, and the reward is only 1 food token, which is not very rich either.

Red looks around and decide to place the ghost on Blue player's dungeon, on which there is no monster card.

Silver Player, who had placed a slime (Combat 7, Cooking Difficulty 10, Reward 2 Food tokens, 2 Victory points) on their own dungeon in their previous turn, let out a sigh of relief.

ard

d
ive
s
you

s
ing

このモンスターとの戦闘では、魔法戦闘力しか使用できない。

ВСТРЕЧА С БОССОМ

Кто первым набрал $\geq 100\%$ на уровне — на его подземелье кладётся босс (Фалин / Сисель). Если босс жив и другой тоже $\geq 100\%$ — он тоже «во встрече» (карта босса не дублируется), другого монстра класть нельзя.

Победитель переворачивает карту и берёт награду (лимит 5).

После Фалин: все с $\geq 100\%$ верха → низ, жетон перевернуть, карты исследования в сброс.

После Сиселя — мгновенный конец (стр. 26).

Immediately when an individual player's Dungeon

in the Upper level, Chimera Falin will be placed on the Lower level. Sissel the

Lunatic Magician will be placed

Chimera Falin

Sissel the Lunatic Magician

If the target boss monster has not been defeated in battle and another player has "stepped over" 100% or more, that player is also (at the same time) in an encounter with the boss monster. No boss monster card will be placed on that player's Dungeon, but they will be playing as if they had encountered the boss monster and will not be able to place another monster card.

card face down and receive the reward.

This card is subject to the same 5-card limit as the monsters who can be cooked in a normal battle (p17).

If Chimera Falin is defeated, all players who have 100% or more on the Upper level "travelling distance" will automatically move to the Lower level.

The "Dungeon Upper Level/Lower Level" tile is flipped over to the Lower Level side (Monsters placed on those players' Dungeon will be selected from the Lower Level Monster deck) All the Exploration cards that have been placed on their play area will be gathered and discarded.

If Sissel the Lunatic Magician is defeated, the game ends instantly (p26).

Пример с боссом

Красный играет 30% (нужно истощить воина/ниндзя — Сенши) → ровно 100% верха → на него кладут Химеру Фалин. Завершает III-IV.

Синий потом тоже набирает 100%: Фалин на него не кладётся, но он тоже во встрече. Если красный не победит её на следующем ходу — синий сможет сразиться.

an encounter s monster

with a
is card,"
he effect
nshi in

Red's Dungeon

Blue's Dungeon (played as if they encountered Chimera Falin)

IV REST

IV. ОТДЫХ

Потратьте любое число еды → восстановите столько же истощённых (можно не тратить).
 Доберите руку до 5. События в руке — сразу вскрыть и применить (порядок — ваш). Добор
 один раз за отдых: после события рука может быть < 5.

Ход окончен → игрок слева снова выбирает Ia или Ib.

Пример отдыха

Красный внизу: бой с гиппогрифом (Лайос, Сенши, Идзуцуми) → готовка; исследование 30% (слесарь/ниндзя — Чилчак) → 100% → Сисель.

На отдыхе 3 еды с готовки → восстановить троих из боя. Добрал 1 карту — событие «Перестройка подземелья»: без истощения слесаря/ниндзя сброс двух верхних % и Сисель уходит. Идзуцуми восстановлена → истощить её и спасти. Рука остаётся 4 (добор уже был).

КОНЕЦ ИГРЫ

Мгновенно при победе над Сиселем.

Очки = предметы + приготовленные монстры + боссы + 1 ПО за каждые 3 монеты – 1 ПО за каждые недостающие 10% до 100% низа (наверху в конце: штраф –10).

Больше очков — победитель.

1. Each player totals the victory points earned at the adventure up to that point.
2. Victory points from items monsters successfully cooked/boss monsters.
3. 1 Victory points per 3 Money unless fractions are rounded down.
4. Penalty: Minus 1 Victory point for every 10% missing off 100% of the tower down the dungeon. (Players at the Upper level at the end of the game receive a full 10 points penalty.)
5. Players are ranked in descending order of total victory points.
6. The player with the most victory points is the winner of the game and named conqueror of the Dungeon!

Player Red has succeeded in defeating Sissel the Lunatic Magician.

Player totals their Victory points.

Пример: Красный

Доспех 2 + гриб 2 + василиск 3 + гиппогриф 4 + Сисель 3D
(бросок $3+3+5=11$) + 0 за 2 монеты – 0 штраф = 22.

1. Monster Card High Quality Armor (Victory Points: 2)
2. Monster Card Scorpion and Walking Mushroom (High Quality Potstickers) (Victory Points: 2)
3. Monster Card Basilisk (Roast Basilisk) (Victory Points: 3)
4. Monster Card Hippogriff (Boiled Hippogriff Potstickers) (Victory Points: 4)
5. Boss Monster Card Sissel the Lunatic Magician (Victory Points: 3D)
6. Potstickers
7. To determine the victory points of Sissel the Lunatic Magician 3 dice are rolled.
8. The result of the roll is 7-6-9, and the total points total.
9. Since the player had 2 money tokens in their possession,
10. that winning points from them is 0.
11. The penalty for stopping over the dungeon is 0, as can be seen from the fact that Sissel the Lunatic Magician was defeated.

The result is "2+2+3+4+4+11+0-0" for "22" victory points.

Синий

Украшения 4 + статуя 5 + растение 2 + гарпия 3 + Фалин 2D
(2+5=7) +1 за 4 монеты -2 (80% низа) = 20.

Monster card Man-Eating Plant (Man-Eating Plant Tart)

Victory points: 2)

Monster card Harpy (Rolled Harpy-Egg Chelet) (victory

points: 3)

Monster card Chimera Falin (victory point: 2D)

(Failed to cook the igloo)

The player rolls a dice to determine the victory point of

Chimera Falin

The result is 2 and 5 for a total of 7 points.

The player gains 4 Money tokens, so they gain an

Серебряный

Сундук 1D (4) + приправа 2 + слизень 2 + червь 3 + кролик 5
+2 за 6 монет -0 = 18.

Побеждает Красный с 22!

Monster card Treasure Chest (victory points: 1D)

Item card Seasoning (Victory Points: 2)

Monster card Talking Old (victory points: 1D)

Monster card Treasure (victory points: 1D)

Monster card Rabbit of the Labyrinth (victory point: 5)

The player rolls a dice to determine the victory point of

the Treasure Chest card

The result is 4

Since they have 6 Money tokens, the victory point is 2.

Since the player reached depth 100%, there is no

penalty

The resulting score is 4+2+2+3+5+2+0 for

points

Thus, Red with 22 points is the winner of this game!

SELECTION RULES

ВАРИАНТ: ДРАФТ ПАРТИИ

Вместо готовых партий: перемешайте всех персонажей (Фалин можно). 5 игроков — по 5 карт; 2-4 — 5 или 6 (лучше 6). Лишнее в коробку.

Выберите 1 карту → передайте остаток влево. Повторяйте до конца. Дальше — базовые правила.

Желательно ≥ 2 воинов, ≥ 1 маг, ≥ 1 слесарь/ниндзя. Кулинарную силу (4 карты) берите в приоритете.

In a normal play, each player chooses the party they will be in charge of in "Game Preparation" (p.8) from one of the original groups. Otherwise, they can use the Draft rule: the players choose the adventurers they control through draft.

First, turn all the character cards face down and shuffle them well.

Note that you may include Falin (she is very good!).

If you are playing with 5 players, deal 5 cards to each player.

When playing with 2-4 players, discuss with everyone whether to deal 5 or 6 cards each.

If you are not sure, deal 6 cards.

Any excess character cards should be returned to the box with the cards facing up.

Each player chooses one character card that they want to control and hand the remaining cards to the player to their left.

This is repeated until there are no cards left to hand; the cards kept by the players will represent their party for the game.

For everything else, the rules are exactly the same as the basic rules.

The balance of classes is important. There should be at least two "warrior" and at least one "magician" and one "blacksmith (or ninja)".

Character cards with "sucking power" (only 4 cards exist) should be secured as a priority.

If you are familiar with the original comics, you will be able to weave a story in your heads and by looking at the parties that are created!

If you are familiar with the game, please try to enjoy the game with this rule.

ЧАСТЫЕ ВОПРОСЫ

«Яма»: нельзя отказаться истощать доступного слесаря/ниндзю.

«Необычная комната»: можно вылечить слесаря магией восстановления; магию слесаря применять не обязаны.

Несколько перебросов: да; можно восстановить и перебросить снова.

Кончились жетоны еды/денег: лимита нет — ведите учёт иначе.

Нет цели для меча/предмета: жетон в запас.

Бой без участников: нельзя — нужен ≥ 1 .

Дриада: база физ. силы = 1, но +меча и предметы работают (Лайос+меч: $1+2=3$).

Q: I drew the event card "Sum of the Unknown" and my party's knowledge was exhausted. Can I use the wizard's "recovery magic" to heal and unexhaust my locksmith?

A: Yes, you can. The special ability of a character card can be used in conjunction with other effects. If you answer the first question in conclusion with the correct answer, you can choose not to use "locksmith magic" even if the wizard has the special ability of "locksmith magic" and still has magic tokens left.

Q: If there's a hero that can change into the party with Reiki, can this be repeated more than once?

A: Yes, it is also possible to use "recovery magic" to restore the character who used the reiki from exhaustion, and then use the reiki again to exhaust that character.

Q: If the game run out of food/currency tokens, how can I replenish them?

A: There is an upper limit to the number of food/currency tokens. If you run out of tokens, you can substitute with something else like using a sheet of paper to keep track of the tokens.

Q: What happens if there is no "warrior" or "mage" in the party when the magic of sword token is acquired?

A: If the target character for the token is not in the party, the token is returned to the stock.

Q: Can I choose not to have any of my characters participate in In Battle?

A: No, you cannot. If you choose to fight, you must have at least one character participate in In Battle.

Q: How are sword tokens and reiki that increase a party's combat value handled in a combat against the "boss"?

A: The special ability of the "boss" will set the physical Combat Value (Combat Value) in the upper left corner of the card of the character. It is higher than 1, but it will not affect the increase in physical Combat Value from sword tokens or reiki. If your fight "boss" has a sword token (physical Combat Value 2), then 1+2=3, and "boss" can be defeated.

DUNGEON MESHI INTRODUCTION

О «ПОДЗЕМЕЛЬЕ ВКУСНОСТЕЙ»

Манга Куи Рёко с 2014 (HARTA / KADOKAWA). Партия Лайоса, спасая Фалин, вынуждена готовить монстров в пищу.

Обаяние — в деталях экологии подземелья и рецептах. Если пришли из Monster Maker или из-за Канай Сэйдзи — загляните в оригинал манги.

Monster Maker Introduction

O MONSTER MAKER

Карточная игра Судзуки Гинъитиро, 1988 (Sho-Kikaku) — классика с десятками продолжений.
Ремейки: Epoch 2004, Arclight 2018.

Цель оригинала — пройти подземелье и вынести сокровища; без готовки и еды.

Судзуки (ум. 2021) читал «Подземелье вкусоностей» и ждал этот проект. Спасибо за разрешение взять Monster Maker за основу.

Monster Maker is a card game. The development of these games is not limited to card games, but has expanded to board games, video games, RPGs, TCGs, comics, novels, drama CDs, and more.

In 2004, Epoch Co. released a remake of the game, and in 2018 Arclight released it for the 30th anniversary. The original version of the game is still enjoyed by many customers more than 30 years after its release.

The objective is to advance through the dungeon, obtain treasures, including the quest. The game is much simpler than this one, as there are no demons such as drinking or recovery.

If you picked up this game because you were intrigued by the title that it is related to "Dungeon Meshi," please look up the original game, "Monster Maker," as well.

Legendary game designer Gintaro Suzuki, who sadly passed away in 2021, had read "Dungeon Meshi," the original story, before this project started. He was really looking forward to this project, in which Mr. Seta Kame, one of Japan's leading game designers, was to create a board game based on "Monster Maker" in the universe of "Dungeon Meshi." We would like to take this opportunity to thank him for agreeing to use "Monster Maker" as the base for this game.
